CAREER SUMMARY

I am really good at working on existing projects, adding new features, fixing bugs, and building software applications.
Below are some of the skills I have been able to build on and improve during my career:

- Full Stack Development: Java 8+, JSP, Spring Framework, Spring Boot, Hibernate, Mybatis, JSTL, JPA, JavaScript, NodeJS, TypeScript, PHP, CodeIgniter, Laravel, Python, Django React, Vue, Redux, Nuxt, Gatsby etc.
- Blockchain Development: Smart Contract, Solidity, Rust, Python etc.
- Experience with SQL/NoSQL, Relational Database, Search Engine: MySQL, PostgreSQL, Microsoft SQL Server, Oracle Database, SQLite, MongoDB, Redis, Apache Solr Elasticsearch etc
- Experiences with the following tools and platforms: Eclipse, IntelliJ, Apache Tomcat, Glassfish Server, JBoss Application Server, Maven, Gradle, PyCharm, WebStorm, VSCode etc
- Analysis and design
- Ability to learn new technology
- High communication skills
- Ability to work comfortably in these server environments: Ubuntu and Windows
- RESTful Web Service, WebSocket(Socket.IO, SOAP, STOMP), GraphQL
- Version Control Systems (GIT).
- DevOps, Docker, Kubernetes
- Ability to use Amazon Web Services(AWS), Azure, GCP, Heroku, cPanel etc.

Feel free to hit me up anytime.

WORK EXPERIENCE

Freelance

2021 - Present

- Fullstack Web development with Java and Spring Framework.
- Blockchain and Smart Contract development.
- Microservice, Rest API, WebSocket, GraphQL.
- Web hosting, Web Security, SEO, Database, Server management.

Technologies used:

- Java
- Spring Framework
- Spring Boot
- Javascript
- Solidity
- React

Software Engineer

2018 - 2020

- Backend development (Java/Spring Boot, Gradle, Postgres)
- Frontend development (Javascript, Typescript, React, Gatsby)
- System integration (REST API, WebSocket)
- Agile development (Jira, Kanban)
- Involved in planning, dallies, and general software engineering practices with important stakeholders.
- Teamwork and collaboration (Git Work Flow)
- DevOps (Bitbucket pipelines, GCP environment, Docker, Kubernetes)

Technologies used:

- Java
- Spring Boot
- Javascript
- Typescript
- React
- Gatsby
- Docker
- Kubernetes

Software Engineer

2017 - 2018

Concise System

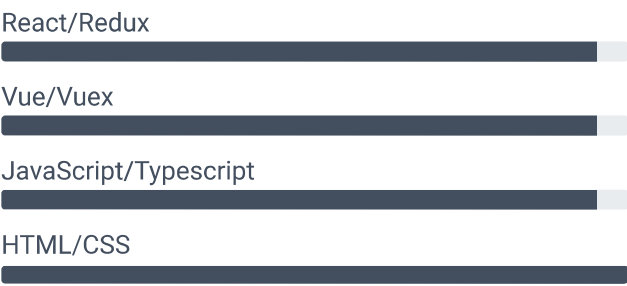

Yumuv

SKILLS

Backend

Frontend

Blockchain

Others

- C#
- PHP
- Laravel
- Python
- Django
- WebSocket
- GraphQL
- Prestashop
- Shopify
- Docker
- Kubernetes

EDUCATION

-

Java Spring Boot Javascript Typescript React Docker Kubernetes

ToLet.com.ng

- Developer application/website: A platform where real estate developers like Lekki Gardens showcase, market, and manage their projects.
- Landlord Activation Application: Helps Tolet Landlord Hero Team to keep track of all processes involved in bringing in a new landlord.
- Management for tolet CRM application
- Agent application.

Java Spring MVC Oracle Database Javascript Elastic Search

MSc in Information Technology
2011 - 2014

BSc in Information Technology
2008 - 2011
